IMPROVED
DESIGN

A whole new level of lightweight comfort, while maintaining the full-leather protection.

- Special design offering up to 40% reduced weight and superior comfort without compromising durability and protection.
- Selected premium A-grade cow-hide leather.
- Larger panels with fewer seams.
- Collar worn up blocks flying sparks and intense UV radiation. Worn down, it improves airflow and gives you a better range of head movement.
- Dome-less design eliminates jacket tears, localised metal heat transfer against the chest, and a smooth, snag-free exterior surface.

Collar up & down feature

Worn down, it improves airflow and gives you a better range of head movement for standard, low-risk positioning.

Collar worn up blocks flying sparks and intense UV radiation, especially during overhead work.

Shoulder and upper arm lining

Shoulder and Upper arm lining adds comfort and safety and helps the jacket slide on and off with ease.
